

Do you have more questions?

StoneSet is a problem solving paving system, we have decades of experience in the industry and can help you with all your porous paving and retrofit paving needs. We love working with our clients to select colours, helping with costings and specification so please call to discuss your specific requirements any time.

HOW LONG WILL IT LAST?

StoneSet comes with a 10 year guarantee; however, the resin technology is designed to last in excess of 25 years. PourOn (our DIY product) comes with no guarantee; however, has a design life of 5-10 years.

WILL IT STAY THIS SHINY?

No. The top layer of the resin will weather, leaving you with a natural tone of either the aggregate or the recycled glass. That is unless you want a gloss coat, which we can apply during the install or at a later date to give the "gloss look".

IS IT EASY TO CLEAN?

Yes. StoneSet is very low maintenance and easy to look after. It can be cleaned simply with detergent, a brush or pressure washer.

*environmentally conscious,
and using locally sourced
materials.*

WHERE IS STONESET AVAILABLE?

StoneSet is available across the whole of Australia and New Zealand.

CAN I DRIVE ON STONESET?

Yes. StoneSet can be designed to take heavy traffic, including buses and trucks.

Green paving for sustainable landscapes

With decades of experience in the industry, we can help with all of your porous and resin bound paving needs.

Our technical sales team offer full guidance during the construction and design process and have an installation network which reaches every corner of New Zealand.

Why StoneSet?

We are flexible in our approach and we enjoy working with our clients to ensure the specification, colour, design and the finished result are exactly as you desire.

We deliver on promises and always go the extra mile to ensure the best possible outcome is achieved.

We continue to improve the way we operate so we can offer the best service to our customers whilst working in an environmentally conscious way and using locally sourced materials.

What is StoneSet?

STONESET IS AN INNOVATIVE PAVING SYSTEM THAT PROVIDES A MORE SUSTAINABLE PAVING SOLUTION IN TWO AMAZING WAYS:

- 1 Overlay surface dressing, our super strong, flexible resin coats a range of beautiful aggregate which is then applied as a new surface layer to many types of existing hard surfaces, from concrete to existing pavers. Perfect to cover tired, old, even cracked surfaces while eliminating excavation costs, saving time and money.
- 2 Porous Paving, StoneSet provides a hard yet porous surface, the binder locks the stone together while leaving voids between the stone particles. These voids allow the water to soak through creating a 100% porous surface with no gaps for weeds or to create trip hazards. Porous paving has many benefits including: reducing surface run off, improving the health of surrounding trees and increasing your soft to hard landscaping ratio.

StoneSet is suitable for:

- ✓ Driveways
- ✓ Pathways
- ✓ Tree Surrounds
- ✓ Courtyards
- ✓ Playground
- ✓ Pool Surrounds
- ✓ Art Features

About StoneSet

Established in New Zealand since 2007, StoneSet has a portfolio of work across the country showing the diverse applications, the variety of designs and colours as well as the quality finish achievable when using StoneSet resin bound paving.

Our development is influenced by the needs of the market and we are constantly seeking to improve in terms of quality of product, service, sustainability and creativity.
